Multi-Level Data Fields

eMERGE™ Program Customer Benefits – Process Analytics Use Case

Improved Process Yield + Reduced Downtime = Increased Profitability

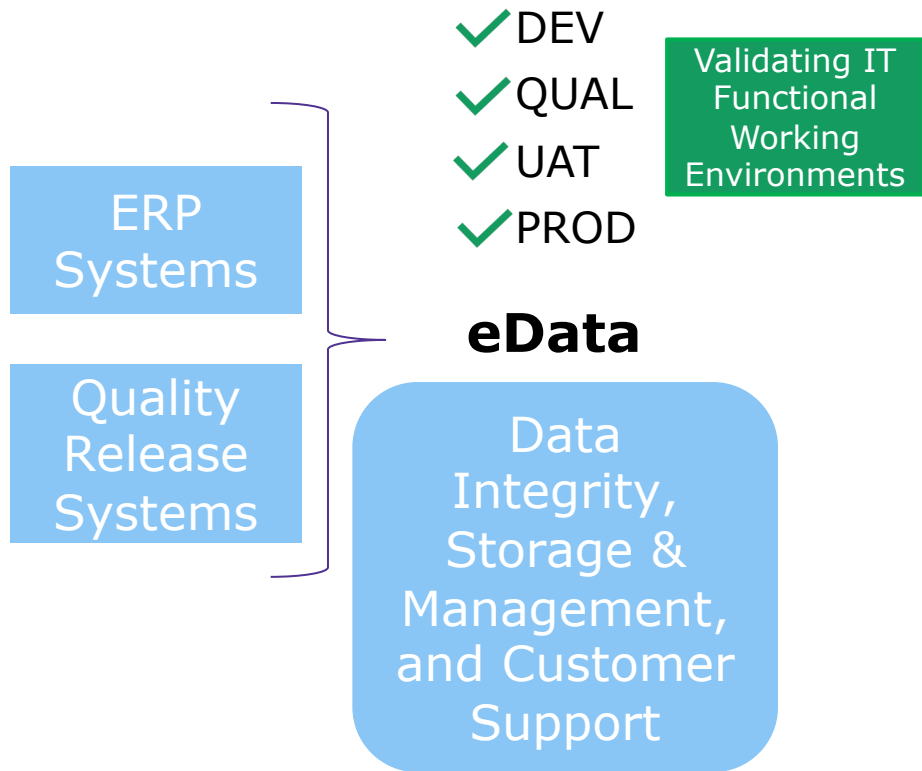

eMERGE™ Customer Collaborations

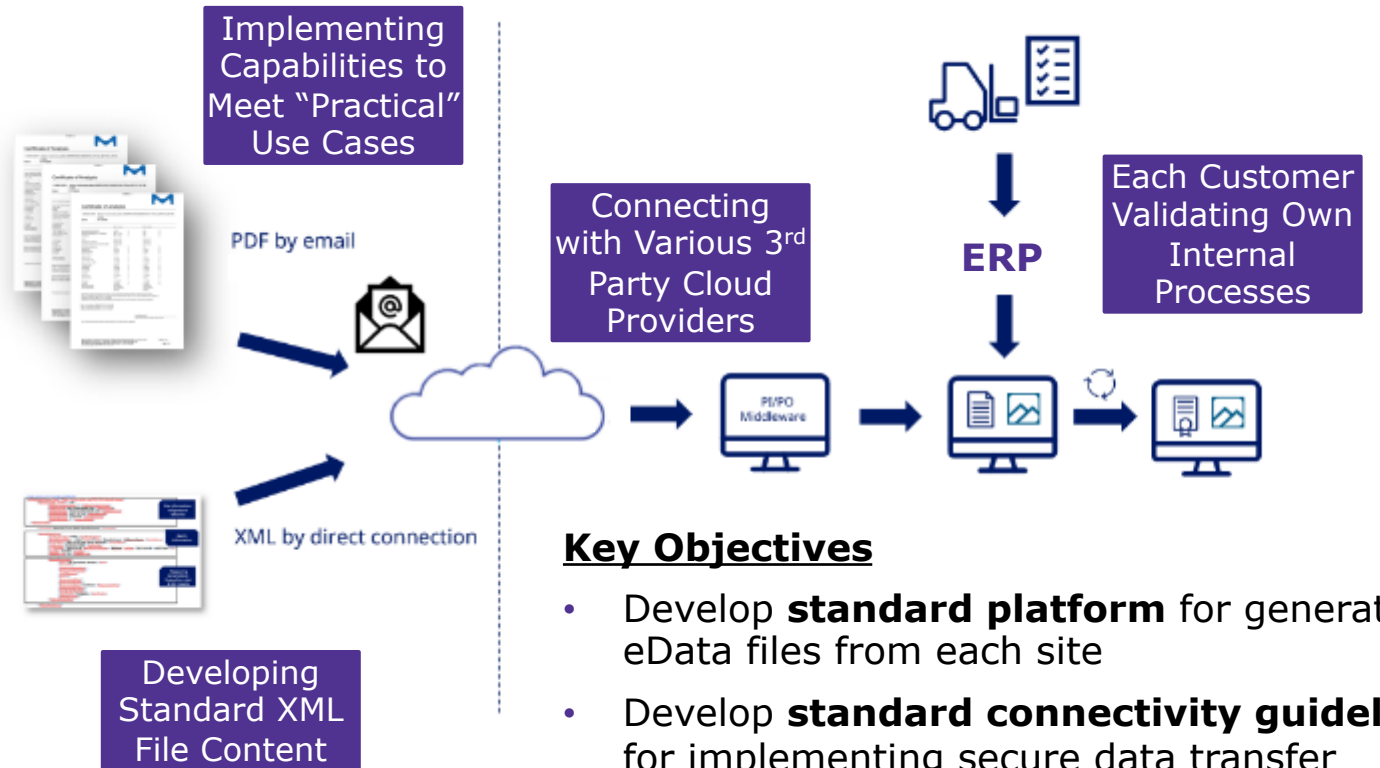

Customers are working with us to build an Industry Standard

Internal eData Readiness Development

Sample Pilot Customer Development Architecture

Key Objectives

- Develop **standard platform** for generating eData files from each site
- Develop **standard connectivity guidelines** for implementing secure data transfer
- Validate **Go-Live processes** for sharing production eData

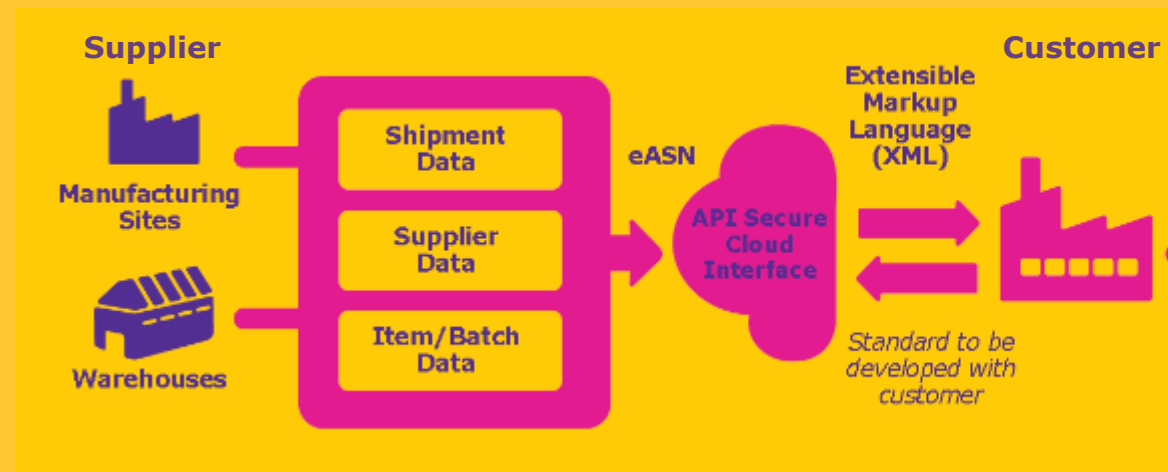

eASN Initial Offering

Collaborate with customers to establish a Biopharma Industry Standard

E- Advanced Shipping Notification (eASN)

Key Customer Personas

- Production Planning
- Procurement
- Receiving Dock / Department
- Incoming Quality
- Inventory Management
- Production Staging
- Manufacturing
- Process Quality

Improved Release Time + Available Inventory = On-Time Delivery

Customer Benefits – Logistics Analytics Use Case

Phase 1: Basic eASN, focus on Delivery data for Digitalized Goods Receipts Process

Mandatory

- Purchase order number
- Material number
- Customer's material number (only if provided)
- Line number
- Supplier Lot/Batch number
- Shipment number
- Date of shipment dispatch (Shipment Date)
- Estimated Delivery date
- Shipped Quantity
- Number of pallet

Optional

- Packing list
 - a) Description
 - b) Weights (gross, net, total)
 - c) Dimension
- # of material/box
- # of unit
- Delivery address
- Tracking
- Delivery type/shipment method
- Carrier
- Supplier name and address

Phase 2: Expand eData Capabilities, adding Quality data for Fast Quality Release

- Trusted weight (depends on EZ BioPack package)
- Expiring date
- Original of Manufacture
- Country of Origin
- Date of manufacture
- Temperature logger data

Phase 3: Adding additional Physical Capabilities for fast verification

- Barcode label
- License plate number
- Sampling

SUMMARY

BIOPHARMA SUPPLY CHAIN IS COMPLEX
Many custom solutions and processes driving inefficiencies

STANDARDIZATION IS THE KEY
Industry standards required for broader acceptance

COLLABORATION IS REQUIRED
Focus on working with key business partners

THIS IS A JOURNEY, NOT A PROJECT
Phased implementation with incremental benefits

THANK YOU
